

SETBACK STAKING

Herrick & Salsbury, Inc. is frequently asked by clients to stake setback lines. A setback from a property line or road is usually a set distance in accordance with a town's land use ordinance. Once we know where the boundary line is located, this setback determination is straight forward.

You can rely on Herrick & Salsbury, Inc. to be your trusted advisor.

Setbacks created may be from:

- A property line
- Wetlands
- Protected wildlife habitat
- A stream
- A river
- A lake
- The ocean

"Herrick & Salsbury, Inc., and in particular Tara, in the last few years has been great to support us in creating a high level of accuracy in their surveys. With their level of accuracy in their work, we're actually able to produce our landscape plans to that same degree of accuracy."
